PERSONAL EXPERIENCE

TEAMMATES

PROJECT C++ 2025

Developed a console-based Car Rental System in C++ to automate the process of renting vehicles, managing car inventories, and calculating customer billing. The system provides a seamless interface for both administrators to manage vehicle logs and customers to view, select, and rent available cars

TEAM LEADER

PROJECT ASSEMBLY LANGUAGE 2025

This project involves developing assembly language programs to solve specific computational problems using arrays, loops, and logical instructions and discusses how low-level programming concepts, such as indexed addressing and register management, are used to process Information ranging from student marks and age demographics to state-level donation distributions.

VOLUNTEER

PROMPTRUSH AI POWERED GAME DEVELOPMENT SPRINT 2025

Participated in a high-intensity, 1-day AI game development sprint organized by Google Developer Group on Campus UTM. Successfully designed, built, and deployed a functional, interactive game from scratch within a limited timeframe by leveraging modern generative AI workflows and cloud technologies.

EDUCATION

SIJIL PELAJARAN MALAYSIA

SMK TELOK PANGlima GARANG

3A+ 1A 3A- 2B+

2020-2024

DIPLOMA IN COMPUTER SCIENCE

UTM SCHOOL OF PROFESSIONAL AND CONTINUING
EDUCATION

CGPA 3.50

2025-2027
